

Facilities Committee

The Facilities Committee is responsible for addressing the strategic planning and implementation of deferred maintenance, repairs, and the construction of school facilities.

This includes:

- Developing and updating a Master Facility Plan, whenever needed.
- Identifying the need for improvements to existing facilities.
- Reviewing the need, scope, and projected costs of requested projects.

In doing so, the Facilities Committee ensures that the necessary infrastructure is always in place for academic, extracurricular, and co-curricular programs and services.

In a nutshell, the Facilities Committee helps to ensure that the school campuses are functional, attractive, and well-maintained by tackling the challenging work of updating the campus master plan and developing harmonious relationships between buildings, open spaces, and landscaping.

If you would like to learn more or have questions, please contact Ms. Molly Grunberg at mgrunberg@iics.k12.tr
